

## ETP Thermal Dynamics

ETP Thermal Dynamics Is the industry's provider of high-quality thermal management technologies. ETP repairs and overhauls heat transfer components and systems for major and regional airlines, rotor-wing, and general aviation market segments. ETP offers a full work scope support for air to air Heat Exchangers, Precoolers, Reheaters and Condensers. We specialize in various Oil Coolers for all engine and APU applications Bench Test through Recore.

### COMPETITIVE DIFFERENCE

- Unmatched product design knowledge providing the best repair value
- Readily available access to OEM product, Technologies, data and replacement, Parts for integration of all repaired, Products
- All In house repair capability, testing- Recore
- Fast and Consistence turnaround time
- Holder of core repair brazing and welding processes allowing for the highest-quality Repairs and product performance
- Available Rotable & Exchange Pools
- 24/7 AOG Support

### CORE COMPETENCIES

- TEST, REPAIR, AND OVERHAUL HEAT TRANSFER COMPONENTS & SYSTEMS
- HEAT EXCHANGERS
- PRECOOLERS
- REHEATERS
- CONDENSERS
- OIL COOLERS

### CORE TECHNOLOGIES

- HEAT TRANSFER MODELING & DESIGN
- TESTING
- AFTERMARKET SUPPORT SERVICES

### CERTIFICATIONS

- FAA REPAIR STATION NUMBER 3ETR854C
- EASA.145.6741
